Career Objective

Information Technology graduate with a strong foundation in software development, backend development, web technologies, databases, and problem-solving. Passionate about building reliable software solutions, learning new technologies, and continuously improving technical skills. Eager to contribute to a collaborative team, gain hands-on industry experience, and add value in an entry-level software or IT role.

Education

Bachelor's Degree in Information Technology (IT) 2022 – 2026
Faculty of Engineering and Computer Science, Al-Ahqaff University

Projects

Ewan – Wedding Hall Booking Management

A web-based system designed to manage and book wedding halls, aiming to simplify and organize the booking process for users through a smooth interface that prevents scheduling conflicts. It also provides an advanced admin dashboard that gives hall owners full control, real-time booking management, and efficient communication with users.

Thaki – Nutrition & Calorie Tracking

A smart application powered by AI to manage nutrition and body weight in a flexible and intelligent way. It calculates daily calorie intake accurately and helps users track their weekly health goals.

Weekly Schedule Management Website

A smart task scheduling system that organizes weekly tasks in a flexible way. It includes productivity charts and stores previous data locally for tracking progress over time.
